RACE HORSE COMPANY

UNCOMPROMISING CONTEMPORARY CIRCUS

Race Horse Company was born in 2008 out of need to create uncompromising, personal and completely new kind of contemporary circus. Race Horse Company's rough-and-ready performances are based on aesthetics of chaos, humour and surprise.

The company approaches circus without questioning, leaving philosophy and thinking to the spectators. Since the very beginning, Race Horse Company has focused on touring and so far produced six contemporary circus performances and three Circus cabarets. The ultimate objective is no less than taking over the entire world.

ABOUT THE SHOW

Race Horse Company's massive international success Super Sunday is colorful, vivid and perky and was born out of the possibility of implementing our wildest dreams and bringing them on stage. Super Sunday is a combination of the company's basic elements in a humorous rollercoaster ride with a boneheaded approach and endless black humour.

Super Sunday is the company's biggest production and goes from the floor to extreme heights with huge acrobatic stunts. The artists worked on the tricks and storyline together without a director, which created possibilities to expand their own artistic expression and creative improvisation.

Every artist has a unique style that comes together with the team in spectacular fashion. The death wheel was a new discipline for all of the performers and you've never seen it performed like this before. Super Sunday also includes double trampoline, two human catapults, teeterboard, acrobatic balls, Russian bar, and floor acrobatics.

In the beginning six cowboys welcome the audience and take them on a journey into the amusement park world of "Super Sunday". Surroundings and reality disappear as unexpected events unravel and the artists serve you with a mind-blowing continuation of surprises and astonishment.

Hold on tight and enjoy the ride!
